

*Here Is The Free Thyroid Report For Women You Requested That Chronicles...*

# **How Women On Thyroid Hormones Are One By One Being Misdiagnosed And How This Health Care Flaw Is Having Devastating Effects On Women's Health...**

*Day After Day...Year After Year...*

*Inside This Women's Thyroid Report You'll Discover...*

- ✓ That You Are Potentially Afflicted With A Devastating Disease Process That Is Going On Inside Your Body Right Now...UNDIAGNOSED!
- ✓ How To Find Out If Something Critical Was Missed By Your Doctor While Diagnosing Your Thyroid.
- ✓ Why Even Though Your Doctor Told You That Your Thyroid Was Normal You Still Feel Deep Down Inside That Something Is Wrong With Your Metabolism...(You are probably right)
- ✓ How To Determine If You Are Doing Everything Possible To Improve Your Thyroid Function And Your Health.
- ✓ The Most Common Reasons Why Your Thyroid Function And Health May Get Worse With Time Not Better!
- ✓ What To Do Right Now If You Suffer From Low Thyroid.
- ✓ Why Even Though You Are Taking Thyroid Hormones And Your Lab Work Comes Back Normal You Still Have All The Signs And Symptoms Of Low Thyroid.

**Symptoms like...**

- *Weight gain even with low calorie diets.*

- *Fatigue*
- *Inability to lose weight even with intense and sustained exercise.*
- *Depression*
- *Constipation*
- *Overly sensitive to cold weather*
- *Poor circulation*
- *Muscle cramps while at rest*
- *Morning headaches that wear off as the day progresses*
- *Catching colds and other viral/bacterial infections easily and have difficulty recovering*

### **Signs like...**

- *Dry or brittle hair*
- *Your hair falls out easily...sometimes in clumps*
- *Dry skin (even in humid climates)*
- *Low axillary temperature*
- *Edema (swelling/water retention) especially facial*
- *Loss of outside portion of your eyebrows*

**In Addition You Will Also Receive Recently Added Bonus Information...This FREE Information Alone Could Change Your Life Forever...**

***And much much more!***

Dear Low Thyroid Sufferer,

If you are reading this report then there is a good chance that you or a loved one has been struggling with a low functioning thyroid (hypothyroidism) or you suspect and feel that you must have a thyroid problem even though your doctor tells you there is nothing wrong. This may be the one thing you read about your thyroid that may change your life forever. I am about to reveal secrets so shocking in this report...secrets that quite frankly will push you to the brink of rage and disbelief.

You have either just been diagnosed with a low functioning thyroid (hypothyroidism) and have been placed on thyroid hormones or you have been living with the effects of hypothyroidism

for years without any improvement of your symptoms despite thyroid hormones and normal lab results...Or you have suspected for a long time that you have a thyroid problem, but your doctor has “checked” and tells you everything is normal.

I am about to provide you with the information that could quite possibly change the way you feel and look practically overnight. Information that could once and for all unlock the mystery behind why you still have all these low thyroid symptoms.

**More importantly I am going to share information with you about the most common cause of hypothyroidism in the United States. This causative factor completely changes the diagnosis and treatment of your condition.**

In fact if you are afflicted with this condition the stakes are much higher than fatigue, weight gain, depression, constipation, etc.

## **Read As Though Your Life Depends On It...**

You are one of many women suffering with hypothyroidism or the many symptoms of low thyroid...And in my opinion...From what I have seen you have quite possibly been misdiagnosed or at the very least you have not been given a complete diagnosis...And this is very dangerous.

Many women, maybe even you, lay awake at night wondering why they are having so much difficulty losing weight always suspecting and feeling that something was being missed with their thyroid.

Thinking to themselves why else would I have literally every thyroid symptom if my thyroid was normal. Wondering how it could be possible now that I'm on thyroid hormones and my labs are now normal...how could it be possible that I still have all the same low thyroid symptoms.

The bad news is... You are right to wonder...You also have every right to be frustrated, because it has been my experience that most thyroid disorders are either missed, incompletely diagnosed, or flat out misdiagnosed.

And there is one thing that is most often missed...

And when it is missed it can have devastating impacts and effects on your health. Sort of like missing cancer. Not quite as serious but I think you get the point.

However, if you take massive action after reading this report you could be a woman who never again wonders if something is being missed. You will have iron clad certainty that all is well.

The secrets I will reveal to you in this report will enlighten you to the point that you will want to tell every woman you know who is taking thyroid hormones what you have discovered. When you are done you will be wondering why your doctor never revealed this information to you before.

## **What You Discover In This Guide May Change The Way You Look And Feel Forever...**

Now, first things first. Before we go any further, I want you to do me a favor...promise you will read this entire report, word for word, at least twice. Why twice? Well, because there is so much valuable information that can possibly give you your life back and answer all your questions about why you have been feeling the way you feel. – I just want to make sure you “get it all” and don’t miss anything. After you read it twice, don’t throw it out...give it to someone else taking thyroid hormones or a friend who has suspected a thyroid problem for years. I want you to feel the incredible connection and inner fulfillment I do, when I give you these “secrets” and unlock the thyroid ankle chains that have stolen and IS stealing so much of your life.

From this moment on, as you read further and discover the ONE THING, above all others, that can quite possibly answer all your burning questions about your thyroid and why you feel and function the way you do, you will also realize you are no longer alone...you will NEVER, EVER be alone again.

## **Here’s Why Putting This Report Aside Could Cost You A Healthy, Happy Life...**

If you’ve been desperately searching for answers. REAL and HONEST answers as to why you continue to have low thyroid symptoms and HOW you can get better. If you’re sick and tired of feeling poorly even though you are taking thyroid hormones and your lab work is normal. If you want to FINALLY get your life back...

And if by now you are chomping at the bit to find out the MOST COMMON CAUSE of hypothyroidism in this country and how that could be devastating your health across the board then reading this entire report *RIGHT NOW* and not putting it on a pile next to your unpaid bills, will prove to be the biggest, most important decision you’ve made in a long time.

**Do NOT put this off or you WILL miss out.** You will kick yourself later as you realize reading and following this simple report was the help and information you’ve been praying for since hypothyroidism stole your figure, your sense of well being, and your life.

After reading the next 16 pages, you will feel that giant weight being lifted off your chest as you get the answers to your greatest hopes and dreams...as you get the answers to that huge,

debilitating life altering monster that cripples your enthusiasm for life, strains your relationships, and at this point causes you concern that something serious has been missed.

You know that monster I'm talking about – The “Thyroid Monster” that causes you to take thyroid hormones even though you feel basically the same – the one that causes you to hate to walk into your closet or a department store to find an outfit. The one that cause the bone-crushing fatigue. The one that causes you to always feel depressed for no apparent reason.

I'm here to tell you it does NOT have to be this way...it does NOT have to be a struggle anymore.

**I'm also here to be your knight in shining armor...To pass along to you one of the biggest flaws in medicine today as it relates to hypothyroidism.**

How is that possible you may be asking? My doctor has checked “everything”...I have even seen an endocrinologist...How could something have been missed...How could my doctor have not checked for the most common cause of my problem, especially if it's as serious as you are making it out to be?

*Well it's not only possible it's probable...Hypothyroidism in my opinion is often missed, incompletely diagnosed, misdiagnosed, and when this important piece of the puzzle, which I will reveal to you shortly, is missed or ignored it can be very serious. It's not about the luck of the draw. It's about little known secrets. And what's a secret? A secret is nothing more than knowledge.*

## **Knowledge That You Don't Have Knowledge That Your Doctor Or Endocrinologist May Not Have Knowledge That Could Change Your Life Forever!**

**Imagine** how life would be if you could lose weight with ease...

**Imagine** how life would be if you could grow your hair back with ease...

**Imagine** how life would be if you no longer had debilitating fatigue...

**Imagine** if you were no longer depressed...

**Imagine** what life would be like if you no longer need laxatives or fiber pills...

**Imagine** what life would be like without water retention...

**Imagine** what life would be like knowing that nothing has been missed and no stones left unturned...

Well, stop imagining... **The information you need is here!!!**

Hi, my name is Dr. Stephanie Chaney, D.C. I am about to reveal to you what I believe is one of the biggest MEDICAL FLAWS going today.

I am also going to reveal to you why so many women feel and in fact know that something is wrong with their thyroid but their doctor always gives them a clean bill of health.

Why would I offer this free report and reveal all this to you...a complete stranger?

Well, I know just how frustrating hypothyroidism can be for women. My wife has the very condition that I will reveal. Because of this, I know how the symptoms of low thyroid changes your life for the worst. I also know that so many women out there are missing an extremely important piece of the puzzle.

A piece of the puzzle that when it is diagnosed completely and correctly, changes the diagnosis and treatment protocols for hypothyroidism...A piece of information that once diagnosed means that the problem is no longer a thyroid problem.

How do I know how YOU feel?

Well, I help women with thyroid problems EVERY DAY. You see a large part of my practice is devoted to helping women just like you. Devoted to a disease that in my opinion is grossly mis-managed...often missed...often misdiagnosed.

## How In The World Could A Doctor Miss My Thyroid Condition?

Ok let's start with this first...I have seen a lot of women in my office that are frustrated literally coming into my office in tears, because they feel and know beyond a shadow of a doubt that they have a thyroid problem.

They present with every thyroid symptom imaginable, yet doctor after doctor, specialist after specialist have told them that their thyroid was normal.

Missing thyroid problems is very common...Allow me, without getting too technical to explain how this happens.

First of all you must run the proper tests in order to make an accurate and complete diagnosis. This is where most doctors fail. By in large most doctors only run one thyroid marker...**TSH (thyroid stimulating hormone)**. If it's elevated then and only then do they make a diagnosis of primary hypothyroidism. This is when thyroid hormones are prescribed...This is the only time they are prescribed!

This is a huge mistake...Just on a basic level there are three other markers that should be ordered in order to have a complete thyroid panel. **(T4, T3, and a free thyroxine index)**

So that's the first problem...Incomplete testing!

The second mistake is lack of knowledge or forgetting basic hormone physiology.

So hopefully without too much brain damage let me attempt to explain the basics of how hormones work.

First of all a part of your brain called the hypothalamus sends a chemical message (**TRH thyroid releasing hormone**) to your pituitary gland, also in your brain, telling it that more thyroid hormone is needed in the body. Very common place for a break down!

Next your pituitary gland releases **TSH (thyroid stimulating hormone)** which signals the thyroid to get to work. This is by far the step that gets analyzed the most in a traditional medical setting. Certainly problems arise at this step, however just because this step is normal does not mean that thyroid function is occurring normally as you will see. **(If you haven't fallen asleep that is yet ☺)**

Your thyroid then releases T4 (Thyroxine) and T3 (Triiodothyronine) by far producing much more T4 than T3. The important part here to understand is that T4 is inactive.

Your body must then convert inactive T4 to active T3. It accomplishes this through an enzyme known as **5 Diodinase**. Many women for various reasons have a huge problem with this step. **This is called underconversion.**

**This step is very important for women currently taking thyroid hormones and still have low thyroid symptoms. Let me explain.**

You are being given a synthetic form of T4 in the way of your prescription medication. One potential problem here is that your body does not recognize this synthetic hormone and as a result will have trouble converting it to active T3. I see this problem often in my clinic and is certainly one of the many reasons a woman will be taking thyroid hormones, show normal lab results and still have all the symptoms.

Now let's back up just a little bit. When your thyroid releases the thyroid hormones they then must be bound to a protein carrier. Sort of like a taxi cab for the hormone. The protein molecule takes the hormone for a ride in the body to where it must then get out of the taxi cab or what is otherwise known as cleaving itself from its protein carrier.

Once it is free of its protein carrier it can then do its work, which is vital to every single cell in the body.

Many women have a problem at this step. They can't cleave the hormone from its protein carrier. Therefore even if they are producing enough thyroid hormones they don't have enough free hormone in circulation to do work. This is called a **binding protein problem**.

The active thyroid hormones in circulation then must signal back to the brain (hypothalamus and pituitary) that enough hormone is now in circulation to shut off the production. This is known as a **negative feedback loop**. For sure one of the biggest problems for women with thyroid problems.

The moral of my brief attempt to teach you basic hormone physiology is that hypothyroidism can be caused by a break down at many different points. In addition I have to admit I am a little bit of a nerd.

Let me give you a summary of all the different types of hypothyroidism possible in a woman's body.

- 1. Primary Hypothyroidism (high TSH)**
- 2. Underconversion**
- 3. Binding Globulin Problem**
- 4. Hypothyroidism secondary to pituitary dysfunction**
- 5. Loss of negative feedback mechanisms**
- 6. Thyroid resistance**
- 7. XXX (We will talk about this one very soon.)**

Allow me to also give you a list of all the different thyroid markers available and critical to making an accurate and comprehensive diagnosis.

- 1. TSH**
- 2. Total Thyroxine**
- 3. Free Thyroxine**
- 4. Free Thyroxine Index**
- 5. Resin T3 Uptake**
- 6. Free T3**
- 7. Reverse T3**
- 8. T3S**
- 9. T3AC**
- 10. XXX (I promise you are almost there...almost to the point of finding out**

**what is in my opinion one of the biggest  
MEDICAL FLAWS going today and how  
this FLAW could be devastating your body  
day by day...setting you up for more  
serious diseases)**

Now do you think for one minute your doctor or doctors have run all of these markers or even half of them...And even if they had the knowledge and foresight to run them could they even analyze them correctly?

Once again I am here to open your eyes to the fact that most doctors would read the above as if it were a foreign language. Not because they are not smart or well meaning, but because this is not how mainstream medicine practices. Period. It is not the standard of care.

And this is a big problem...

However not as big of a problem as the one I am about to reveal to you...

**OK You've Waited This Long...Its Now Time  
For Me To Reveal What I Feel Is One Of The  
Biggest Medical Flaws Going Today.**

Oh shoot I almost forgot I promised you BONUS information that I have just recently added to my report.

This lack of understanding of thyroid function and hypothyroidism is not just seen in the medical community it is also seen in the alternative medicine community.

Many well intentioned natural health care practitioners and many books on natural approaches to hypothyroidism promote the use of two main nutrients to correct and balance thyroid function...And they prescribe it in mass.

And if you are afflicted with the condition I am about to reveal whether it has been diagnosed or still remains hidden and undiagnosed you should get off of these nutrients right away.

***Iodine and Tyrosine...***

If you are taking iodine and tyrosine and have not been diagnosed properly you could be throwing gasoline on a fire. You will just have to trust me on this one...Stop taking these nutrients immediately until you know for sure you are not a victim of this MEDICAL FLAW.

One more piece of BONUS information...

If you have been diagnosed with hypothyroidism and are taking thyroid hormones you should stop consuming oats, rye, barley, and other grains containing gluten.

Even if you take no action at all after reading this report...If you just follow the above advice you will be doing yourself a world of good...and potentially stop a very serious condition from getting worse.

**Ok I have made you wait long enough...However if you are still reading this report I can guarantee you it has been worth the wait.**

## **The Number One Cause Of Hypothyroidism In The United States Is Hashimoto's Thyroiditis.**

What? Whats that you say?

Oh you want me to translate that into English.

Hashimoto's Thyroiditis is an AUTO-IMMUNE condition.

That's right the number one cause of hypothyroidism is not even a thyroid problem it's an immune problem.

You think this might change your treatment a little?

Ok let me break it down for you. An auto-immune condition is when your immune system spirals out of control and begins to attack its own tissue...in this case your thyroid...creating, you guessed it, hypothyroidism or what most doctors see as an elevation of TSH.

The most shocking news is that it almost never gets checked. Can you imagine how many women are walking around with hypothyroidism, taking thyroid hormones and they have never even been tested for Hashimoto's. I guarantee you a whole heck of a lot. I would venture to say most of them.

I would also venture to say that a huge percentage of them actually have this auto-immune condition. I see it so much in my office now it has become no big surprise...sort of common place.

What's even more maddening to me and probably to you is the test is extremely simple and inexpensive. So why don't they test for it?

Well I believe they don't test for it because there are basically no drugs to prescribe for it.

I have even sent some of my patients back to their former doctors with proof that they have Hashimoto's and by in large it gets completely ignored. Oh just keep taking your hormones...you know in fact I think we should up your dosage.

Even when these doctors re-order the tests they fail to even order the proper test to check to see how the auto-immune condition is doing.

This is why I do what I do for women...Because if you have this condition you are basically ignored in the traditional medical model.

And this is very dangerous.

Because the scientific literature is very clear on auto-immune conditions. When you have your immune system attacking one part of your body (in this case the thyroid) you can almost bet it is attacking and destroying other parts of your body.

Maybe more important when you have auto-immune expressions, there is a real possibility that as time goes on this auto-immune expression will begin to spiral out of control and potentially cause more classic auto-immune conditions and continue on a rampage through your body like a Colorado brush fire.

Let me give the benefit of the doubt again...Lets say we are living in a parallel universe where all doctors knew how to diagnose all potential thyroid disorders and had the foresight to order the correct test to rule in or rule out Hashimoto's thyroiditis.

Then you have to have the knowledge of how to manage it. Guess what...the only drug on the market for thyroid disorders is thyroid hormone. That's about it!

So in this parallel universe that I just created you are still out of luck.

## **So What's A Woman To Do?**

### **What's The Secret?**

If you haven't figured it out already...Here it is.

You need a doctor who cares about you and how this disease is negatively impacting your life...A doctor who will spend the time to listen to all of your concerns and really be thorough...A doctor who will put it all together for you and order all the right tests. One that does not just push drugs on you...One that spends countless hours researching the latest and greatest in the treatment of hypothyroidism and Hashimoto's Thyroiditis... One who will take the time to listen and search like Sherlock Holmes to uncover the true nature of your condition.

You need a doctor who has not given up on you...A doctor that won't give up until you become free from a life of misery and dysfunction...You deserve it!!

I know it sounds like an impossibility...A doctor who really cares and listens...One who understands your condition better than anyone...One who has been affected by the condition personally...A doctor with a small town bed side manner and a big city understanding of the human body.

Don't give up HOPE...

## The Dissection Of A Soul...

You see, you can lose a leg...you can lose an arm...but there is NOTHING like an amputated spirit. That's what hypothyroidism can do to you. And the worst part is you are not alone. Hypothyroidism whether it's undiagnosed or is a true auto-immune condition is amputating the spirit of so many women. Women just like you...

Hypothyroidism and Hashimoto's Thyroiditis is a nasty disease ruining the lives of millions of women. Some of these women don't even know they have it. A disease once thought to have the simple solution of thyroid replacement is now becoming more clear and frightening as time moves on.

What I'm here to do is share this information with you. Sharing this information with you I think will change your life forever. Give you the power and energy to live life to the fullest again. **Before it's too late.**

I will take you by the hand and answer ALL your questions...giving you the best possible way to get healthier and stronger.

.....

**I don't care if you've been to 100's of other doctors.** Or if you've tried everything under the sun to no avail. None of that matters.

**The ONLY thing that matters...is your desire to live a healthy life...a quality life...a desire to make sure serious health problems are not being missed...in short your desire to be whole again.**

**Let me be your guide.** I know what you're going through. I have helped countless women in your shoes...even my own wife... and no one can tell me that you are doomed. I KNOW BETTER. I have personally seen many women missing critical information about their condition that changes their overall ability to function optimally.

I've filled my practice just from word-of-mouth. It's taken me months to write this report and now that I have made it available to the Baltimore/Washington D.C. public I'm getting overwhelmed. I'm not sure how many more new women I can accept.

I strictly limit the number of patients so I can give each and every one the individual attention you need to get the best possible results. I refuse to be one of the doctors who spends only 3-5 minutes with each patient. Quite frankly that common practice makes me sick.

So please...if you are at all interested in seeing whether or not your thyroid condition has been missed...incompletely diagnosed...or if you are interested in finding out whether or not your thyroid is being literally destroyed from within.

If you are interested to see if you qualify to be a patient of mine, and see if this is finally the one thing you've been waiting for... the one thing you've been dreaming about...do it now. As I'll explain in a minute, you don't risk a single penny.

## **How Would You Like To Find Out If You Qualify For This Amazing, New Program...Absolutely Free?**

*Here's The Qualification Process...*

- **A consultation with me, Dr. Stephanie Chaney D.C., to discuss your problems and answer ALL your questions. You will be taken by the hand and ALL your questions and concerns will be answered before you leave.**
- **A complete Hypothyroidism/Hashimoto's Thyroiditis qualification case history and questionnaire to help determine if I can help you.**
- **A specialized Hypothyroidism Evaluation.**

- **A Complete Hypothyroidism Dietary and Nutritional Evaluation. Here I will take you by the hand and analyze your dietary habits to determine whether or not you need to make any adjustments. In addition I will personally evaluate all your nutritional supplements, herbs, minerals, botanicals, homeopathics, etc. to determine whether or not they are right for you.**
- **Bring all your medical records. I will go over them with a fine tooth comb to make sure nothing has been missed. I can't tell you how many times I have found something that has been overlooked that could completely change your prognosis.**
- **I will even determine whether or not you have had all necessary and appropriate tests for your condition. I know from experience that you have not had thorough testing done to properly evaluate your thyroid condition.**
- **Finally a written Hypothyroidism or Hashimoto's, whichever is the case, Recommended Action Plan.**

**Total Value (\$325)**

**All Completely FREE!**

**If You Call (410) 216-9180 And Schedule Your Thyroid Qualification Evaluation Before:**

**April 29, 2011**

## **“Now Give Me A Minute To Speak “Off The Record...”**

You’ve spent the last half-an-hour or so reading this report. 16 pages to this point. You **MUST** be seriously interested in what I’ve said and what my Ultimate Thyroid Program can do for you. Finally finding a completely risk-free way to see if everything possible is being done for your disease...making sure that no stone is left unturned must be exactly what you’ve spent so many sleepless, painful nights dreaming about. Nevertheless, 9 out of 10 of you who have made it this far, all the way through this guide, will “chicken out.” Back down when the answer to your prayers may be just one, painless phone call away.

Why do so many people give up without at least giving it a shot? I think you’ve been taken advantage of...played for a sucker more than once...given up hope...Your fears preyed upon by the pharmaceutical ads and drug pushing doctors who never listen to you. By this time you are a little more than “gun shy.” I understand and can’t blame you. You will **NOT** be taken for a fool and dismissed. You will be given **ALL** the tools you need to get relief from your thyroid condition. – Now the only question left is...are you gonna chicken out?

## **Remember When...**

If you can think back right now to a time before you first began having thyroid symptoms and that fateful day when an official diagnosis of hypothyroidism hit you like a ton of bricks. Or if you have spent years with the struggles of all the symptoms with no answers insight. Imagine how wonderful you felt without all the hassles and complications. Now you are constantly being told you are eating too much and that’s why you can’t lose the weight...Being told to exercise more to lose the weight...Constant embarrassment about your hair falling out and losing its youthful shine...and the most frustrating.. is that your thyroid is normal.

Imagine how that would feel again...to have the energy and incredible connection again to life...with your spouse, your children, your family – and if you could look back on today, sitting here reading this report, as being the beginning of that – the beginning of the happy, fulfilled, healthy life you’ve always wanted. If you can feel that **RIGHT NOW** and want that feeling to continue, you probably should, and ought to pick up the phone and schedule your evaluation **RIGHT NOW!**

## **Here’s What To Do Next...**

So, if you’re really serious about ending your suffering and making sure you are not auto-immune once and for all, call (410) 216-9180 by

**April 29, 2011**

---

Remember you must call by the date stamped above to receive your consultation with me Dr. Chaney.

Absolutely FREE with no further obligation!

**Disclaimer: All free consultations are subject to availability based upon Dr. Chaney's schedule. Should she run out of space for his thyroid program you will not be able to schedule an appointment until she opens her schedule again to take new patients.**

Why go another day with hypothyroidism eating away at your life or Hashimoto's eating away at your body, when the possible answer to your thyroid woes may be right here, right in front of you? How would you feel, finding out years from now, the answer to your problems was right in front of your face all along...and you let it slip through your fingers?

Sincerely,

Dr. Stephanie Chaney, D.C.

**P.S. One Last Thing – It's Really Important** – Please remember...I can not possibly accept everyone into my program. I could easily get swamped very quickly. If that happens, I will have to stop the offer and start a waiting list. I did not write this guide to get rich. I have a very busy practice already. No. I wrote this guide because I honestly want to make a difference for as many women as possible. And I'm always amazed at how quickly and easily someone's life can **completely turn around**. Now with this report, I get the message out to many women. It's exciting for me...

**So don't delay on this.** If you want to find out if you qualify for this amazing program...call right now. After all the women I have helped not one has ever regretting calling my office. That's pretty phenomenal...and it proves this is the real deal...not just smoke and mirrors. This is very important. Call today.

**P.P.S.** The decision you make right now by either picking up the phone and scheduling your free evaluation or throwing out this guide may have a drastic effect on the rest of your life. It may be the difference between enjoying the rest of your life and doing all the things you want to do and suffering on the sidelines of life as this disease takes control. This decision is as serious as a heart attack and I hope you make it wisely.

**P.P.P.S.** This evaluation will take about 1 hour. There will be 8,760 hours in the next year. You will spend those hours many ways. How many of those hours will be spent watching T.V.? Worrying? Sleeping? Doing "nothing?" Wasted!! I promise you will not miss this one measly hour from your hectic schedule. After your evaluation your life will only be one hour shorter, but thousands and thousands of hours "better."

**P.S. #4** What's the worst thing that can happen to you if you come in and get your FREE THYROID EVALUATION?

Is this an opportunity you can afford to pass up?

Call (410) 216-9180 to schedule your FREE THYROID qualification evaluation. Remember, there is absolutely no further obligation but you must call by the date stamped in this guide to receive this \$325 value completely FREE!

***Disclaimer: This guide is for informational purposes only. It is not designed to substitute for professional and individualized health advice. Please do not stop or start taking any prescription medication without the advice of a licensed health care practitioner as this can be very dangerous to your health. You should always consult with your doctor regarding prescription drugs.***

***In addition it should be noted that this report is for informational and educational purposes only and should not be misconstrued as a claim or representation of a cure, rather a natural and nutritional approach to managing thyroid dysfunction.***
